CONTACT INFORMATION	355 Fitzpatrick Hall Department of Computer Science and Engineering University of Notre Dame, IN 46556, US	Phone: (+1) (574) 292-6516 Web: <a href="https://github.com/wyu97">wyu97.github.io</a> E-mail: <a href="mailto:wyu1@nd.edu">wyu1@nd.edu</a>
RESEARCH INTERESTS	<ul style="list-style-type: none"><li>• Applied Machine Learning</li><li>• Language Model Pre-training</li><li>• Natural Language Generation</li><li>• Question Answering Systems</li></ul>	
EDUCATION EXPERIENCE	<b>University of Notre Dame, IN, US</b> Ph.D. in Computer Science and Engineering <ul style="list-style-type: none"><li>• Advisor: Professor Meng Jiang</li></ul> <b>Sichuan University, Chengdu, China</b> B.S. in Computer Science and Technology <ul style="list-style-type: none"><li>• Graduated with honors</li></ul>	Aug. 2019 – <i>present</i> GPA: 3.95/4.0  Aug. 2015 – Jul. 2019 GPA: 3.84/4.0
INDUSTRY EXPERIENCE	<b>IBM Greater China Group Lab, Beijing, China</b> <i>Data Scientist Intern; Worked with Dr. Minquan Gao</i> <ul style="list-style-type: none"><li>• Worked on tabular data extraction.</li></ul> <b>Microsoft Research, Redmond, Washington, US</b> <i>Research Intern; Working with Dr. Chenguang Zhu</i> <ul style="list-style-type: none"><li>• Worked on enhancing language model pre-training with dictionary.</li></ul>	Jan. 2019 - Mar. 2019  June 2021 - Oct. 2021
HONORS AND AWARDS	First Place at the 14th Notre Dame CSE Annual Poster Contest Notre Dame CSE Select Fellowship Tang Lixin Excellent Student Scholarship National Scholarship of China	2020 2019 2018 2017
CONFERENCE TUTORIAL	[T1] <b>Wenhao Yu</b> , Meng Jiang, Zhiting Hu, Qingyun Wang, Heng Ji, Nazneen Fatema Rajani. “Knowledge-Enriched Natural Language Generation”, in EMNLP 2021. <ul style="list-style-type: none"><li>• With more than 120 people (virtual &amp; in-person) attending the tutorial</li><li>• With more than 300 people following our Github repository <a href="#">[Link]</a></li></ul>	
PEER-REVIEWED FIRST-AUTHOR PUBLICATIONS	[C6] <b>Wenhao Yu</b> , Chenguang Zhu, Tong Zhao, Zhichun Guo, Meng Jiang. “Sentence-permuted Paragraph Generation”, in EMNLP 2021. [C5] <b>Wenhao Yu</b> , Xiangyu Dong, Chenguang Zhu, Meng Jiang. “Injecting Entity Types into Entity-Guided Text Generation”, in EMNLP 2021. INVITED TALK	HIT, Improving language diversity in paragraph generation, Nov. 2021 Google Research, Knoweldge-enriched natural language generation, Nov. 2021 EMNLP Tutorial, Knoweldge-enriched natural language generation, Nov. 2021 Microsoft Research, Improving language model with dictionary, Sept. 2021 Notre Dame, Improving language model pre-training with dictionary, Sept. 2021
SELECTED PROJECT EXPERIENCE	<b>Improving Language Model Pre-training with Dictionary</b> <ul style="list-style-type: none"><li>Proposed to enhance language model pre-training by leveraging definitions of the rare words in dictionaries (e.g., Wiktionary). We designed two novel self-supervised pre-training tasks on word and sentence-level alignment between input text sequence and rare word definitions. It can significantly improve the understanding of rare words and boost model performance on various NLP downstream tasks (Submitted to ACL 2022).</li></ul> <b>Sentence-permuted Paragraph Generation</b> <ul style="list-style-type: none"><li>Proposed to permute the sentence orders to improve the content diversity of multi-sentence paragraph. It maximizes the expected log-likelihood of output paragraph with respect to all possible sentence orders. It can generates more diverse outputs with a higher quality than various SoTA (EMNLP 2021 main).</li></ul> <b>Knowledge-enhanced Text Generation</b> <ul style="list-style-type: none"><li>Proposed a multi-step decoder that injects the entity types into the process of entity mention generation. It effectively embeds the entitys meaning into hidden states, making the generated words precise. (EMNLP 2021 oral.)</li><li>Wrote a survey paper on knowledge-enhanced text generation. The main content includes two parts: (i) general methods and architectures for integrating knowledge into text generation; (ii) specific techniques and applications according to different forms of knowledge data. (Submitted to ACM CSUR.)</li></ul>
